## **DETAILED ACTION**

## Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 2, 4, 31, 33-35, 37, 41-42, 44, 51, 71 and 74-77 are rejected under 35 U.S.C. 102(b) as being anticipated by Osorio et al USPN 6,341,236. Osorio et al teach a vagal nerve stimulation system 10 for stimulating the vagus nerve. The system includes a heart rate sensor 15, generator 20 and electrodes 25. The sensor measure heart rate intervals 605. Microprocessor 200 calculates and instantaneous heart rate610 as well as the heart rate variability 615(column 9 lines 5-37) If the heart rate variability is too great, the microprocessor applies adjusted stimulation (amplitude, width and frequency) to the vagus nerve.

## Allowable Subject Matter

Claims 3, 5-30, 32, 36, 38-40, 43, 45-50, 52-70, 72, 73, 78-80 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
